Job description:

LEED HIMMEL INDUSTRIES, Inc. is a growing manufacturer of custom aluminum extrusions and architectural products. We are currently seeking a career-minded professional **Architectural Drafter** who thrives on a challenge, has a positive, can-do attitude, and the energy and desire to succeed to join our drafting department.

Job Summary:

To create shop drawings & create fabricated metal product drawings (curtain walls, store fronts, building cladding systems, canopies, sunshades, railings, etc.) per architectural specifications. Work in collaboration with outside engineering contractors and architects to coordinate and implement all required design criteria.

Technical Knowledge:

- Knowledge of manufacturing processes, engineering of architectural systems for commercial and residential structures, architectural and building documentation.
- Knowledge of industry standard drafting practices for architectural and mechanical drawings using Autodesk Autocad & Inventor.
- Must be proficient with Autocad computer software, including Microsoft software, Excel, Outlook, Inventor is a **Plus**.
- Knowledge of general engineering concepts and methods and experience with field conditions and methods of construction.
- Excellent math skills including the use of formulas, fractions, compound angles, and trigonometry. Ability to visualize three dimensional objects and designs.
- Ability to multi-task and manage multiple issues simultaneously. Able to manage change and to anticipate problems and develop solutions to consistently meet customer expectations.
